

HAFEEZAH

Frontend Engineer & Visual Designer

GitHub: github.com/HAFEEZAH029 | LinkedIn: linkedin.com/feed | Portfolio contact form

PROFILE

Frontend engineer focused on immersive digital interfaces, responsive systems, and polished user experiences. Combines component-driven engineering with visual design instincts to build products that feel fast, accessible, and refined.

CORE ARSENAL

- React: component-driven interfaces, hooks, reusable UI patterns
- Next.js: app router architecture, server actions workflow, production routing
- TypeScript: safer props, predictable data models, fewer runtime bugs
- Tailwind CSS: responsive design systems, utility-first styling, fast UI iteration
- Framer Motion: smooth transitions, staggered reveals, interaction micro-motion

FEATURED PROJECTS

Audiophile e-commerce app

Next, Redux, Prisma

Premium shopping experience for high-fidelity audio gear with responsive layouts, cart management, and checkout flows.

Invoice App

TypeScript, Next.js, Storage

Invoice management tool for freelancers with real-time status tracking, multi-screen support, and modal interactions.

Habit Tracker

NextJS, Tailwind, TypeScript, Playwright

Mobile-first PWA for creating daily habits, marking completion, and tracking streaks over time.

Sanctuary

React, Tanstack Query, Tailwind, TypeScript, Axios

End-to-end messaging platform for sending and receiving decryptable messages.

CLIENT JOURNEY

- Consultation: Align goals and project needs
- Onboarding: Assets, access, and direction
- Development: Build responsive frontend systems
- Launch: Deploy, handoff, and support
- Proposal: Scope, timeline, and deliverables
- Prototyping: Wireframes into interactive flow
- Testing: Polish, QA, and accessibility
